

**FOR IMMEDIATE RELEASE**

15 September 2017

**Loscam Adds Innovative Vibes to Taiwan Logistics & IOT Exhibition**

Participating as an invited Exhibitor at the recent 22<sup>nd</sup> Taipei International Logistics & IOT Exhibition, Loscam Taiwan showcased some of its regional-specific and innovative solutions since the company's official opening earlier in May this year.

Senior executives from the logistic, transportation, manufacturing, food & beverage and textile sectors visited Loscam's booth during the 4-day event. Alongside the Taiwan-specific wooden pallets codenamed WP3 and WP9, were the new Repairable Plastic Pallet and Pallet Cage, providing added flexibility and enhanced solutions offering for different operations requirements.

"This event demonstrates Taiwan is ready, both in terms of capability and mentality to embrace new concepts and solutions. Companies are exploring new ideas that can bring positive changes to their business operations, as well as support their growth and migration to the international market with the increasing adoption of the Internet of Things (IOT)," said, Patrick Chan, Director for Regional Business Development SE Asia & Taiwan.

"We are delighted to be invited and appreciate the acceptance of Loscam Taiwan as an integral part of the country's logistic industry."

The reputable industry event is co-organized by Chan Chao International Co Ltd, Global Logistics Council of Taiwan and Taiwan Internet of Things Alliance. This year, it was held at Taipei Nangang Exhibition Centre from September 6-9. An annual event, it gathers over 100 companies, 350 exhibitors and more than 70,000 visitors to share insights on the development and implications surrounding the logistic environment, namely the Internet of Things, warehousing capacity, transportation, information collaboration, and logistic equipment development that greatly influence the formulation of intelligent supply chain in Taiwan.
