

LOSCAM Online

NEW FEATURES AND KEY ENHANCEMENT UPGRADE 2015

- New and improved menu screen
The Loscam Online menu option now is displayed across the top of the main screen.
- Customer Code
Loscam Online users will now be grouped by Business Entity and assigned with a Customer code. All users assigned under the Customer code can view all clients and transactions created within Loscam Online.
- Customer Nominated Administrator
To provide flexibility around your specific business requirements, the nominated administrator will manage user access under the assigned customer code.
 - User Creation.
 - Security access creation and assigning to users.
 - Re-set passwords for users.
- Transaction Types
All transaction types can be created. These include: transfers off, transfers on, issues & dehires.
- Multiple products
Multiple products can now be created on one docket.
- Automated Reconciliation
Transactions processed by Loscam are automatically imported into the reconciliation within Loscam Online. Loscam Online will automatically reconcile the imported transactions against transactions keyed in by the user, based on specific criteria (docket number, date, quantity, product type and trading partner).
- Reconciliation Exceptions
Any transactions that don't automatically reconcile will display as an exception in the Loscam Online reconciliation, as a Loscam and/or Customer transaction. Users can follow up these exception transactions and manage them by reconciling, rejecting or correcting. The exception reports can be exported into excel format. Any reconciled transactions can be viewed and unreconciled, if required.
- Corrections/Rejections
Transactions can be rejected or corrected through both the Docket Entry/Correction and Reconciliation options. All rejections and corrections will automatically batch to Loscam, reducing delays with processing times. Transactions rejected or corrected by a user will be flagged within the system for traceability.
- Client Detail Report
Details of all clients created, including the account number, product type and hire profile.
- All other functionality in Version 3 is still available in Loscam Online Version 4.
- Loscam Phone Customer Support
The Loscam Customer Service team will provide ongoing support and training.

Thank you

The Loscam Team
